

Hydraulic press K-HP717

Manual hydraulic press tool, 6-300 mm²

- Large sections of the range - up to 300 mm²;
- Compact press head - ideal for applications with limited access.

Characteristics:

- Are used [interchangeable matrix series KLAUKE «22»](#), narrow crimping;
- The rotary press head gated compact design;
- Low weight;
- The body and handle in stainless steel;
- Comfortable handle with ribbed plastic covers;
- Two-speed hydraulic system with high speed movement of the piston to the wire / cable and with its slow movement during the operation;
- The function returns to the initial position after crimping is provided by turning the main arm around the axis of the tool;
- Applicable biodegradable hydraulic oil is environmentally friendly.

Technical information:

- Crimping force: 60 kN;
- The range of sections: 6 - 300 mm²;
- Divorce matrices: 17 mm;
- Length: 485 mm;
- Weight: 4.5 kg;
- Ambient temperature: from -20 to +40 ° C.
