

Hand-operated hydraulic cable cutter **Klauke K-HS45A K-series** is designed for convenient and safe cutting of copper and aluminum cables, including armored steel tape and ASCR aluminum-steel strands with a maximum diameter of 45 mm.

Features K-HS45A Klauke:

- >> Cutting force: 60 kN (approx. 6 tons)
- >> Cutting range: up to 0 45 mm
- >> Length: 545 mm
- >> Weight: 4,6 kg

Description K-HS45A Klauke:

Compact ergonomic design. Handles in the grip areas are equipped with soft ribbed plastic nozzles.

Cutting head closed type. Extremely robust construction. For ease of positioning the instrument, the head rotates around the axis of the tool.

The two-speed hydraulic system is the rapid approach of the movable blade to the cable being cut.

Returning the knives to their original position at any time is done by turning the handle around the axis.

Tools K-series KLAUKE brand developed in Germany, taking into account the wishes of Russian users. The assembly is carried out in the new own production of Gustav KLAUKE GmbH in Southeast Asia.

The most important parts and components of the tools are delivered to the plant from Europe, where they are manufactured.

Warranty period from the manufacturer - 1 year.
