

SH 600 Busbar processing station

Station for bending, hole punching, offsetting Al and Cu busbars as well as inserting nuts:

- maximum busbar dimensions 12×125 mm
- bending angle range 0° ÷ 90°

Special features:

- equipped with smoothly adjusted bending angle sensor
- equipped with measuring rulers
- height adjustment of hole punching head (1mm precision)
- burr-free round and oval holes punching

Works with AH 500 or AH 550 electric hydraulic units.

Dimensions: (LxWxH): 790x530x498 mm; Weight: 110 kg (without equipment);

Force: 190 kN; Pressure: 630 bar
